

## DG-S1930K Upgrade Operation Guide

### 1. Upgrade via Uboot

During the device restart process, press “ctrl+c” then select “0”

```
U-Boot 3.6.2 (Jun 06 2023 - 10:04:44)

Board: RTL838x CPU:500MHZ LXB:200MHZ MEM:300MHZ
DRAM: 256 MB
SPI-F: OK(ID c2201a)
Loading 65536B env. variables from offset 0x200000
SF: Detected with page size 256 Bytes, erase size 64 KB
SF: Detected with page size 256 Bytes, erase size 64 KB
Net: Net Initialization Skipped
No ethernet found.
SF: Detected with page size 256 Bytes, erase size 64 KB
SETMAC: Setmac operation was performed at 2025-03-17 16:24:57 (version: 11.0)
Press Ctrl+C to enter Boot Menu: 0
Entering simple UI....

===== BootLoader Menu("Ctrl+Z" to upper level) =====
TOP menu items.
*****
0. Tftp utilities.
1. XModem utilities.
2. Run main.
3. SetMac utilities.
4. Scattered utilities.
*****
Press a key to run the command: 0
```

then select “1”

```
Press a key to run the command: 0

===== BootLoader Menu("Ctrl+Z" to upper level) =====
Tftp utilities.
*****
0. Upgrade bootloader.
1. Upgrade kernel and rootfs by install package.
2. Down to memory and jump to run.
*****
Press a key to run the command: 1
```

Keep the pc and the device on the same network segment, and enable the tftp server on the pc, then enter “the local ip”, means device ip address; enter “the remote ip”, means pc ip address; enter “the filename”, S1930K\_DGOS11.4(1)B70P18S1\_12151903\_middle.bin

```
===== BootLoader Menu("Ctrl+Z" to upper level) =====
Tftp utilities.
*****
0. Upgrade bootloader.
1. Upgrade kernel and rootfs by install package.
2. Down to memory and jump to run.
*****
Press a key to run the command: 1
Plz enter the Local IP:[192.168.3.100]:
Plz enter the Remote IP:[192.168.3.7]:
Plz enter the Filename:[XS1930J_RGOS11.4(1)B70P18_10201612_install.bin]: S1930K_DGOS11.4(1)B70P18S1_12151903_install.bin
SF: Detected with page size 256 Bytes, erase size 64 KB
```

Then select “Y” and then begin to upgrade

```
Incorrect device type in kernel
Determined to upgrade? [Y/N]: y
```

After upgrade, press “ctrl+z”

```
Erasing SPI flash...#Writing to SPI flash...done
SUCCESS: UPGRADING OK.

===== BootLoader Menu("Ctrl+Z" to upper level) =====
Tftp utilities.
*****
0. Upgrade bootloader.
1. Upgrade kernel and rootfs by install package.
2. Down to memory and jump to run.
*****
Press a key to run the command:█
```

```
===== BootLoader Menu("Ctrl+Z" to upper level) =====
TOP menu items.
*****
0. Tftp utilities.
1. XModem utilities.
2. Run main.
3. SetMac utilities.
4. Scattered utilities.
*****
Press a key to run the command:█
```

Then select 2, device begin to reload, after reload finished, show version detail

```
1930K>show version detail
System description      : Data General Gigabit Ethernet Switch with PoE(DG-S1930K-8GP2S-120W) By Data General

System software number   : M21350403182025
System serial number     : 1234942570071
System boot version      : 3.6.2_123e3419(700101)
System core version      : 3.10.18.93e51c098383d0
Module information:
  slot 0 : DG-S1930K-8GP2S-120W
    Hardware version      : 1.00
    Boot version          : 3.6
    Software version       : S1930K_DGOS 11.4(1)B70P18S1, Release(12151821)
    Software number        : M21350403182025
    Serial number         : 1234942570071
```

Check the boot version, changed from 3.6.2(700101) to 3.6.2\_123e3419(700101).

## 2. Upgrade via CLI

Let's check the old version first. Use the command : show version detail

```
1930K#show version detail
System description      : Data General Gigabit Ethernet Switch with PoE(DG-S1930K-8GP2S-120W) By Data General
System start time       : 1970-01-01 00:59:59
System uptime           : 0:00:01:35
System hardware version : V1
System software version : S1930K_DGOS 11.4(1)B70P18S1, Release(10180910)
System patch number     : NA
System software number   : M10251406092023
System serial number    : 1234942570071
System boot version     : 3.6.2(700101)
System core version     : 3.10.18.93e51c02e13dca
Module information:
  Slot 0 : DG-S1930K-8GP2S-120W
    Hardware version : V1
    Boot version     : 3.6
    Software version  : S1930K_DGOS 11.4(1)B70P18S1, Release(10180910)
    Software number   : M10251406092023
    Serial number    : 1234942570071
```

Then we upgrade the first software file with cli. Use command to upgrade with  
tftp: "upgrade download tftp://XXXX(pc ip)/  
S1930K\_DGOS11.4(1)B70P18S1\_12151903\_middle.bin

And then device reload auto.

```

```

Check the boot version, changed from 3.6.2(700101) to 3.6.2\_**123e3419**(700101).

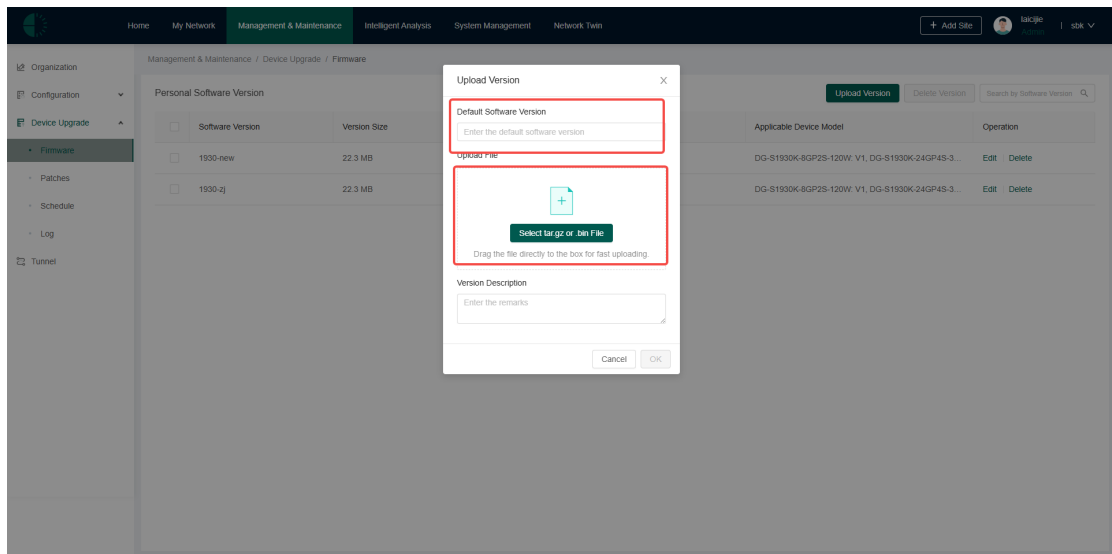

### 3. Upgrade via cloud

Upload the version on the cloud

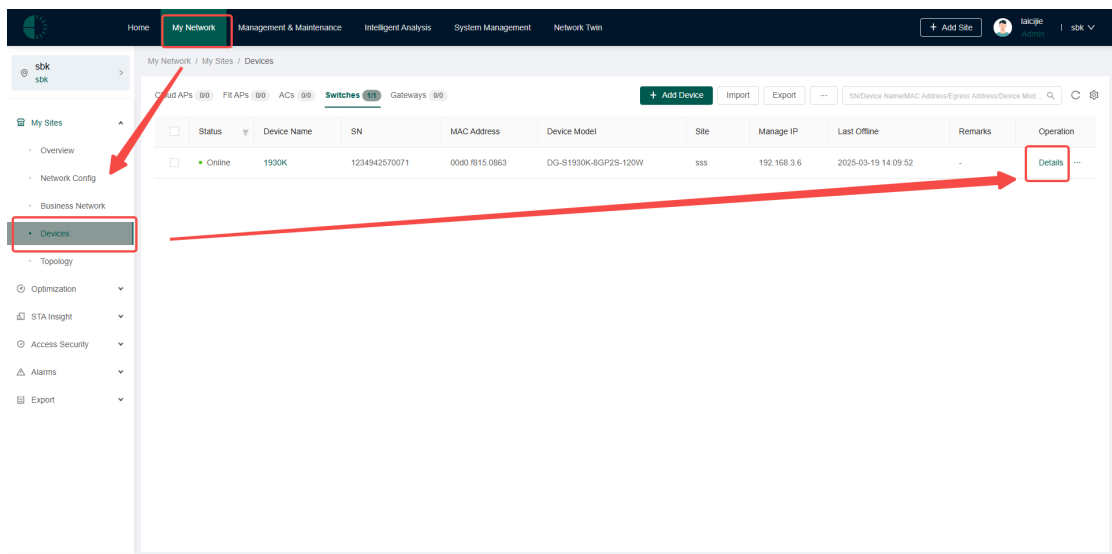

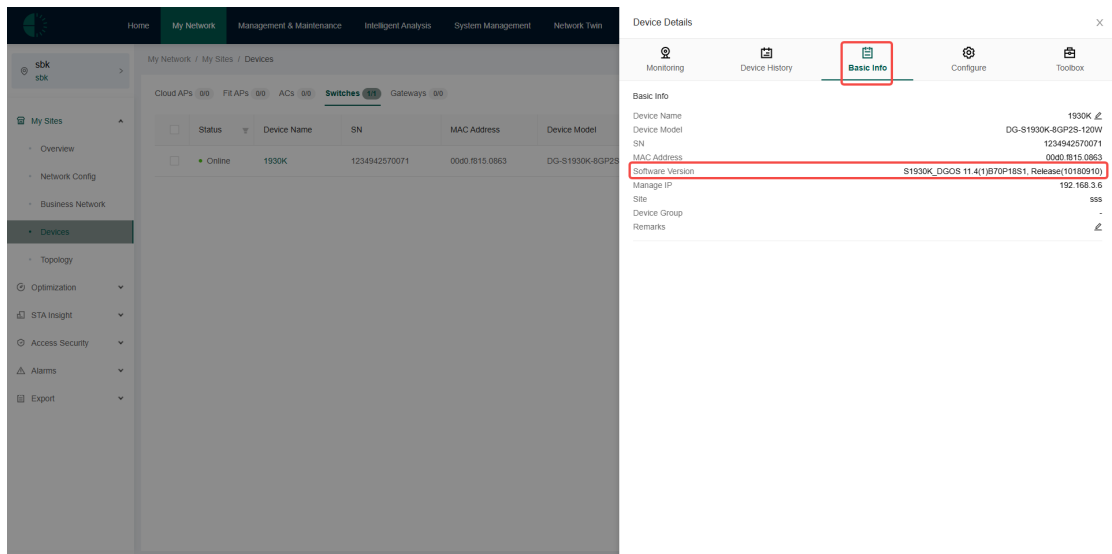

The screenshot shows the 'Management & Maintenance' section of the Data General interface. The left sidebar has a 'Firmware' link highlighted. The main content area is titled 'Person Software Version' and contains a table with columns: Software Version, Version Size, Upload Time, Release Notes, Applicable Device Model, and Operation. Two software versions are listed in the table. A red arrow points from the 'Firmware' link in the sidebar to the 'Upload Version' button in the top right corner of the main content area.

Software Version	Version Size	Upload Time	Release Notes	Applicable Device Model	Operation
S1930K_DGOS11.4(1)B70P18S1_12151821_inst...	22.3 MB	2025-03-19 14:52:32	-	DG-S1930K-8GP2S-120W V1, DG-S1930K-24GP...	Edit Delete
S1930K_DGOS11.4_1_B70P18S1_12151903_inst...	22.3 MB	2025-03-19 14:51:47	-	DG-S1930K-8GP2S-120W V1, DG-S1930K-24GP...	Edit Delete

Check version first

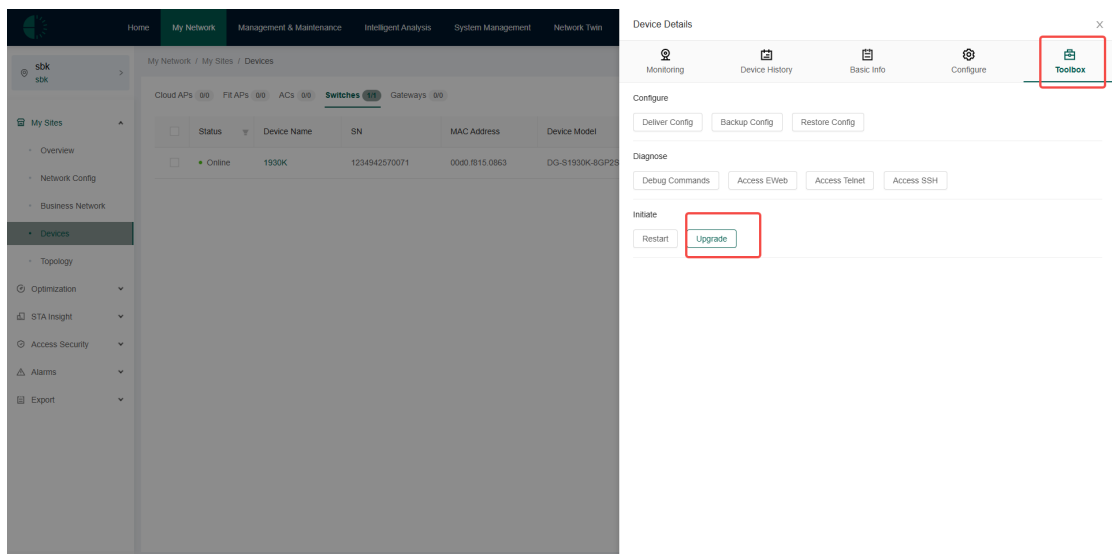

The screenshot shows the 'Device Details' page for a switch. The 'Basic Info' tab is selected. The device information is as follows:

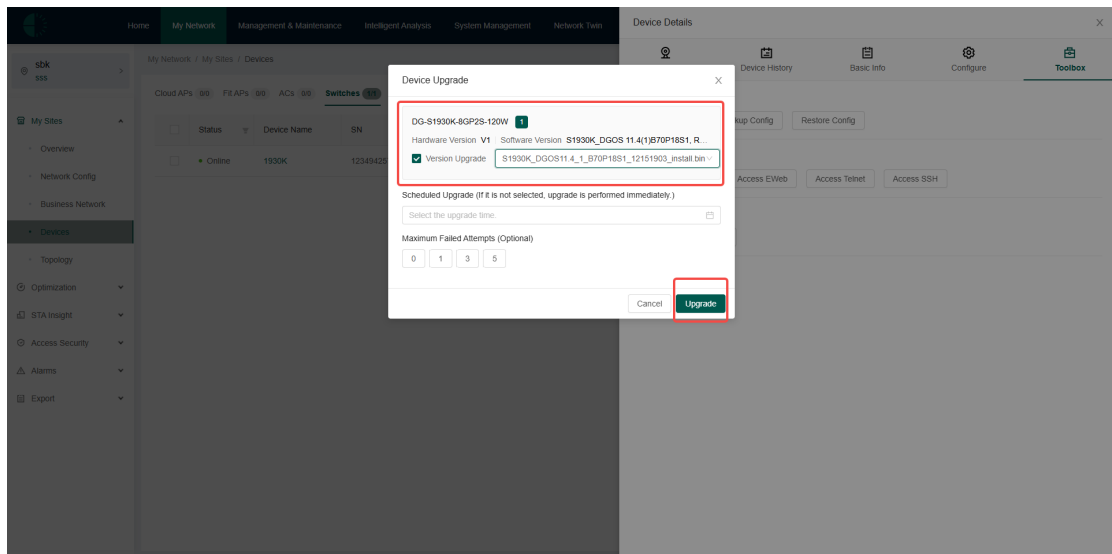

Field	Value
Device Name	1930K
Device Model	DG-S1930K-8GP2S-120W
SN	1234942570071
MAC Address	0000 815 0863
Software Version	S1930K_DGOS 11.4(1)B70P18S1_Release(10180910)
Manage IP	192.168.3.6
Site	555
Device Group	-
Remarks	

Upgrade the first software: S1930K\_DGOS11.4(1)B70P18S1\_12151903\_middle.bin

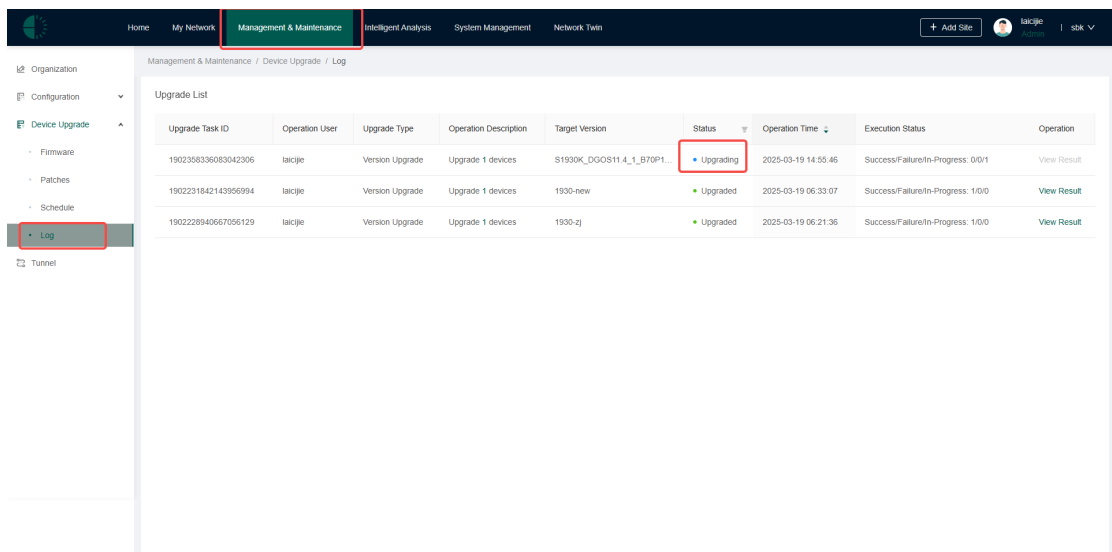

The screenshot shows the 'Device Details' page for the same switch, but with the 'Toolbox' tab selected. The 'Initiate' section contains the 'Upgrade' button, which is highlighted with a red box.

## 4. Upgrade via WEB

Check version first

Upgrade the first software: S1930K\_DGOS11.4(1)B70P18S1\_12151903\_middle.bin

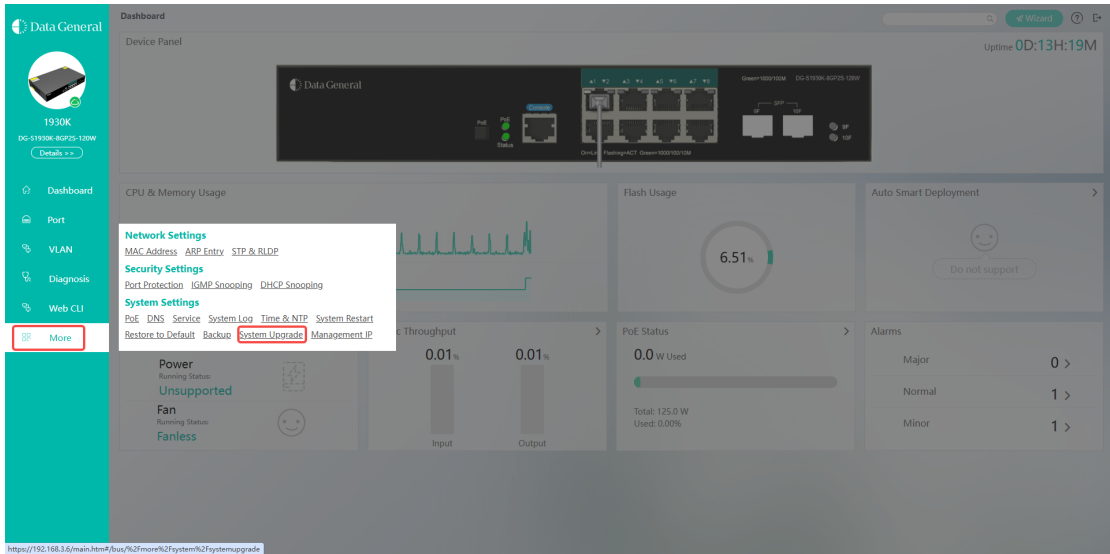

After upgrade, check the versión

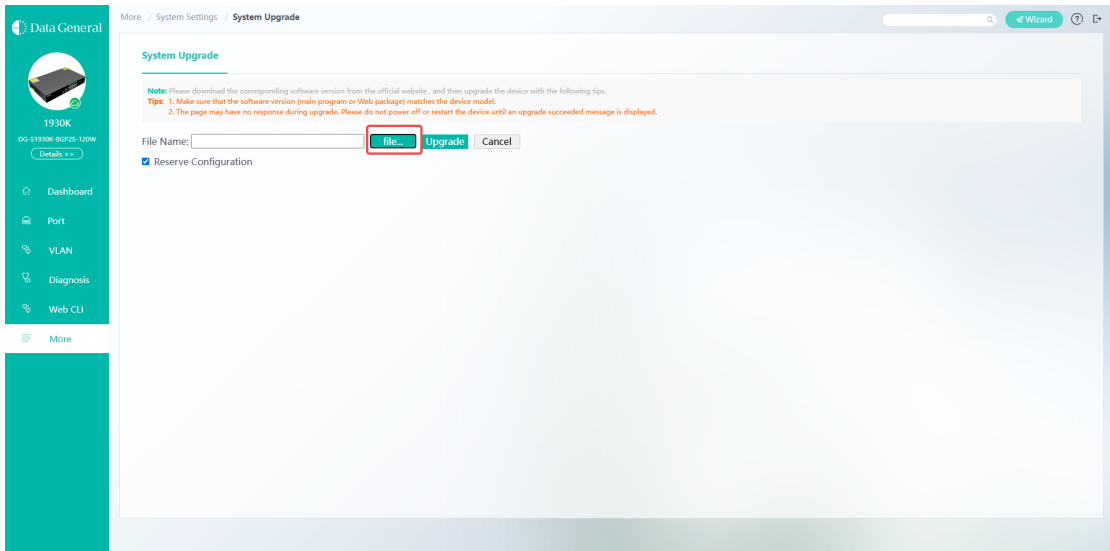

Upgrade the final software: S1930K\_DGOS11.4(1)B70P18S1\_12151821\_install.bin

The screenshot shows the Data General web interface dashboard. On the left sidebar, the 'More' menu item is highlighted with a red box. The main dashboard area displays various system metrics: CPU & Memory Usage, Flash Usage (6.51%), Auto Smart Deployment, Network Settings, Security Settings, System Settings, Power (Running Status: Unsupported), Fan (Running Status: Fanless), PoE Status (0.0 W Used), and Alarms (Major: 0, Normal: 1, Minor: 1). A red box highlights the 'System Upgrade' link in the System Settings menu.

The screenshot shows the 'System Upgrade' page in the Data General web interface. The 'File Name' field is empty, and the 'file...' button is highlighted with a red box. The 'Upgrade' button is also visible. The 'Reserve Configuration' checkbox is checked.

**Note:** Please download the corresponding software version from the official website, and then upgrade the device with the following tips.

**Tips:**

1. Make sure that the software version (main program or Web package) matches the device model.
2. The page may have no response during upgrade. Please do not power off or restart the device until an upgrade succeeded message is displayed.

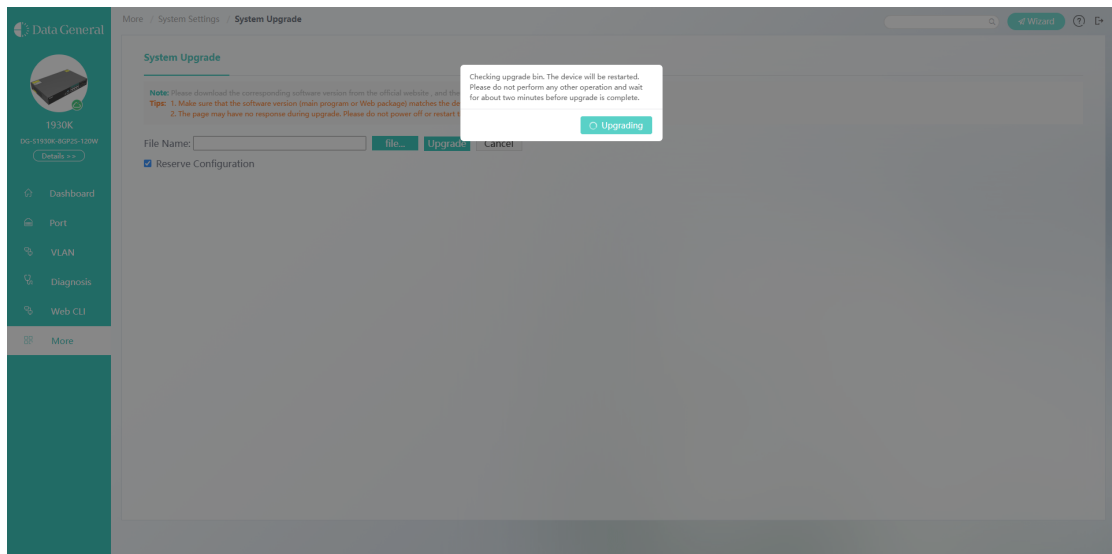

The screenshot shows the 'System Upgrade' page in the Data General web interface. The 'File Name' field is populated with 'S1930K\_DGOS11.4(1)B70P18S1\_101801'. The 'file...' button is highlighted with a red box. The 'Upgrade' button is also visible. The 'Reserve Configuration' checkbox is checked. A progress bar shows 11% completion.

**Note:** Please download the corresponding software version from the official website, and then upgrade the device with the following tips.

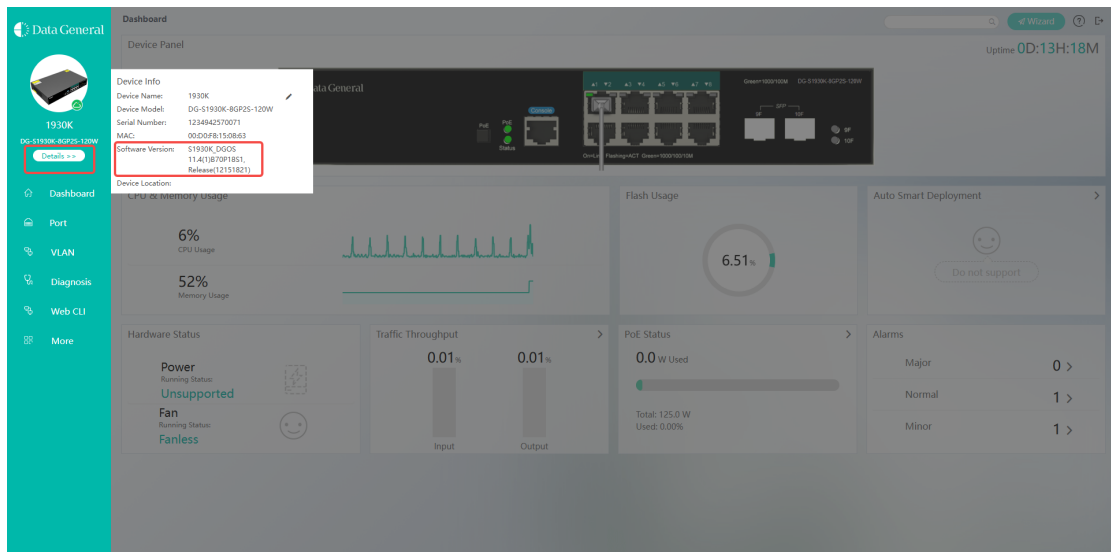

**Tips:**

1. Make sure that the software version (main program or Web package) matches the device model.
2. The page may have no response during upgrade. Please do not power off or restart the device until an upgrade succeeded message is displayed.

After upgrade, check the versión
